  - [Fuehrungsakademie Baden-Wuerttemberg](#), Karlsruhe, Germany
- CAI®- certified Online-Coach
  - [Karlsruher Institut fuer Coaching, Personal- und Organisationsentwicklung \(KIC\) & CAI GmbH](#)

- Coaching is a method that „assist[s] the client to achieve a mutually identified set of goals to improve his or her professional performance and personal satisfaction.“ (Grant & Stober 2006, p. 3).
- systemic solution-oriented coaching concept of the “Karlsruher Schule” (School of Karlsruhe) with the so-called “Musterzustandsaenderung” (change of pattern state)

# Coaching process in Concept of „Karlsruher Schule“

# How is that done in coaching?

- In general by interrupting (a), adding sth. (b), omit sth. (c) or „reshuffle“ the pattern (Muecke 2003, p. 402)
- Resource activation
  - Successful problem solution
  - Professional or personal successes
  - Moment of great pleasure
  - Experiences of nature (Berninger-Schaefer 2011, p. 90)
- Miracle question (De Shazer)
- ....  
(Wolf 2014b, p. 475f.)

- Self-Coaching: coaching without a professional coach
- E-Coaching: Coaching provided with the help of technical means (Geißler, 2008, p. 3)
  - Synonyms:
    - online coaching, tele-coaching, virtual coaching, web-based coaching, distance coaching, cybercoaching
  - Communication channel
    - text-based, e.g. e-mail, online tools/platforms (text-based)
    - audio, e.g. phone, smartpone
    - (audio-) visual, e.g. video calls, avatars (Kanatouri, 2014)

- How to change the pattern state in self-e-coaching from a problem to a solution state or pattern?
- Preliminary works
  - Literature research
  - Work on master's thesis (see Wolf 2014a; Berninger-Schafer & Wolf 2011)
  - Work on final paper for further training in coaching (see Wolf 2014b; Wolf (in prep.))
  - (PhD-thesis)

Self-Coaching App based on CAI App Suite developed by CAI GmbH

- Self-Coaching Concept for PhD thesis on *„Improvement of self-reflection through self-e-coaching of students at Karlsruhe Institute of Technology (KIT)“ (pre-post-intervention control group design)*
- 74 students at KIT
  - aged 19 to 31;  $\bar{x}$  23 years
  - 54 men, 20 women

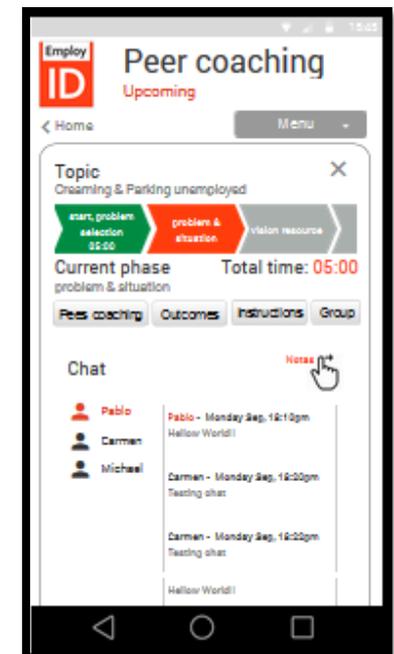

- What is there when the problem is solved?
- How does it feel, now the problem is solved?
- Do you feel anything physical now that the problem is solved? What do you feel?
- What thoughts are going through your head, now that the problem is solved?

**„You are now invited to pretend that the problem is already solved. Imagine you are on holiday. The weather is great. You are completely relaxed. Your problem is already solved. You enjoy your favourite drink in nature.“**

# Use of interventions in a self-e-coaching tool

Intervention	Channels via which the client is addressed		Channels via which the client responds		Level of interaction	Automatic feedback
	Auditory	Visual	Auditory	Visual		
<b>Guide for a holistic change of pattern state</b>	Music, recorded (questions)	Simple text or pictures illustrating the different questions	Possibility to record answer	Possibility to take notes, photos, draw a picture	From recording to creating text to creating pictures	Automated structuring of answers or collage
	Video with the questions taped, music and appropriate background pictures					
<b>Comparisons</b>		Simple text to be completed or pictures to be chosen from the system or own collection	Possibility to record answer	Textual or by adding a picture	From text to creating a picture on the comparison	A picture of the comparison that the client can chose from that shows the meaning of it.
			Answer is recorded while the picture is created to document the process			
<b>Activation of resources</b>	Music, recorded voice with questions	Simple text to be completed or pictures that can be chosen from the system or own collection, resource wheel/tree with explanations	Possibility to record answer	Textual or with a picture or a photo added on	From recording to creating text to creating pictures	Automatic structuring of the answers or collage or a video tape
	Video with a sequence on e.g. a beautiful sunset with recorded questions					
<b>Miracle question</b>	Music, recorded voice with question	Simple text or pictures fitting the different questions	Possibility to record answer	Possibility to take notes, photos, draw a picture	From re-cording to creating text to creating pictures	Automatic structuring of the answers or collage
	Video with the questions taped, music and fitting background pictures					

- Digital paper-prototype on mobile peer coaching (EmployID)
  - Instructions for the „peer coaching facilitator“
    - What is effective?
    - What is supportive?
- More information:  
<http://employid.eu/>

- Identify what is already successful in face-to-face or paper-pencil and find ways to transfer it to self-e-coaching/peer-e-coaching within the process.
  - + very pragmatic
  - - missing out possibilities that the new media can provide
- Identify which interventions are successful and try to only transfer them.
  - + focuses on efficiency of interventions
  - - process is missing
- Identify the core aspect of the existing interventions and create new interventions from that.
  - + more scientific approach
  - - very sophisticated

- Do you have any comments/ideas?
- What approach would you suggest?
- What do you think a self-coaching and peer coaching user needs in an app?

EmployID (<http://employid.eu>) “Scalable & cost-effective facilitation of professional identity transformation in public employment services” is a research project supported by the ICT programme of the European Commission under the 7th Framework Programme (project no. 619619).

I would like to thank Karlsruher Institut fuer Coaching, Personal- und Organisationsentwicklung (KIC) and CAI GmbH for their support by developing the Self-Coaching App for my PhD-thesis.
